Mr. Keith Duerling
Baltimore County
Department of Public Works
111 W. Chesapeake Ave
Towson, Maryland 21204

Dear Mr. Duerling:

It is my great pleasure to thank you for the Maryland Association of Engineers' recent gift to the Whiting School of Engineering and to let you know what a profound difference this support will make.

The Engineering Innovation program enables talented high school students to further explore their passion for engineering. Through this summer experience, high school students are able to gain Johns Hopkins University credits that can be used when they attend college. This program focuses on growing knowledge for students with an aptitude for math and science. This program addresses multiple facets of engineering including lab activities, responding to a request for a proposal, learning about engineering economics, writing a research paper, and completing a comprehensive final exam. Gifts like yours allow us to provide this wide range of experiences. The faculty and students of the Whiting School join me in thanking the Maryland Association of Engineers for this generosity.

Again, thank you the Maryland Association of Engineers' generous gift to the Whiting School. With the critical support of friends like you, I am excited to work closely with our school's remarkable faculty and creative students as we embark upon a new century of discovery and innovation in Johns Hopkins Engineering.

Sincerely,

T.E. Schlesinger
Benjamin T. Rome Dean
